ALMANACK

For the Year of our Lord God,

And from the Creation 5 7 0 1.

Calculated for the Meridian of the Centre

or Middle of England, whose Latitude is 34 deg.

And therefore far more Usefull for this King-

dom in general, than any other extant.

As also, for the whole Kingdom of IRELAND.

By W. TURNER, Gent.

In this Almanack are consained these Particulars.

- 1. A Description of England, and a general Tide-Table.
- 2. A Chronology of memorable things.
- 3. The Sun's Rifing, Setting, Length of the Day & Night, and his place in the Ecliptick, and break of Day.
- the Change, Full and Quarters of the Moon, with the time that every Planet meets with the Moon.
- . Choice Rules for Husbandry and Gardening.
- Prefidents for making Bills, Bonds, Wills, Leafes, &c.
- . Tables for Interest of Money, and for the Purchasing of Lands or Leases of Houses.
- To measure and set out Land. 9. To gauge Vessels 10. To find the hour of the Day by the Sun.
- . The Sun's Declination against every day in the Year.

the Company of Stationers. 1701.

Of ENGLAND in General.

[Orasmuch as this Almanack is calculated for the Meridian of the Centre or middle Latitude of this Kingdom, it is not improper to give some short account of the same. Know therefore that the most Northerly part of England lies in the Latitude of 56 deg. where their longest day is 17 hours 20 min. and their shortest 6 hours 40 min. The most Southerly part lies in the Latitude of 50 d.30 m. So that their longest day is 16 ho. 8 m. and shortest is 7 h. 52 m. And the Latitude for which this Almanack is calculated is for the 54 deg. which is much about the middle thereof, the nearest eminent place thereto being YORK, where the longest day is 16 hou. 54 m. and the shortest 7 h. 6 m. a mean between the two former extreams, and therefore of more general use to the Kingdom in general than any one extant. This Kingdom is in length from Barwick in the North to the Isle of Wight in the South 320 miles, and in breadth from Dover in the East, to the Lands end in Cornwal in the West about 300 miles .- Its compass is about 1300 miles. Its form is not much unlike the form of an Axe or Hatchet, and the whole contains about 30 millions of Acres, which is about one thousand part of the whole Globe of the Earth and Sea together, and is the 333d part of the hitherto discovered part of the babitable World .-- This Kingdom (Wales included) confilts of

IF you would fet out a piece of Garden Ground of an broad : Or by having the breadth of any Furlong or Fu longs together in perches, you may readily by this Tab find what quantity of Ground is contained in it or the eogether; And for the ready making use of this Table, is required to have a rod or pole of fixteen foot and half in length, divided first into ten equal parts by 8ra Nails struck into it, and again, let every one of these to parts be also divided into ten smaller equal parts, I Notches or smaller Nails driven therein. And such a po as this (or one of half the length may ferve) every Cou trey Gentleman or Farmer, or any that 1 out Ground Reap, Sow, Mow or Hedge, pught to have, for by it at this Table he may cast up his own Ground without tro bling a Surveyor. I shall shew the Use of the Table Examples.

Example 1. If the side or end of a Field be 15 Pole Perches broad, how many Pole of that breadth will make of nd 3 Acre?

Look in the Table for 15 in the first Column towar the left hand, and right against it in the next Colum you shall find 5.33. which is 5 pole and 33 hundred pa of a pole, and so much must be measured to ser out h an Acre at 15 pole broad. ____ In the next Colu (against 15 pole broad) you find 10. 66. which is pole, and 66. hundred parts of a pole, and io much be a just Acre. Wherefore, if with fuch a pole abo mentioned, you measure out 10 of those poles, and & the greater, and 6 of the leffer divisions of your pole, end of that measure shall be a just Acre: So likewife,

Perches. Per. parts. 26.667 9 (Perches) 17.77 (In length will the breadth of 10 (broad 7 16. 00 be a just Acre. e Ground be

Example 2. If the breadth of One, or several Furlongs Tab gether in Common Field, should contain in breadth at r the eend 12 Perches, and at the other end 22 Perches, how ble, such in length will make an Acre throughout that Piece?

Because the breadth at both the ends are unequal, add ness them together: So 22 and 12 added together make 34.

The half whereof is 17. which number you must use as if were the breadth throughout. Wherefore look in the County County all find 4 Rod 71 parts for half an Acre, in the next County it at mn against 17 you shall find 9 Rod 42 parts for One at trooper; the next Column 18 pole 82 parts for 2 Acres, able to in the last Column 27 pole 25 parts (or one quarter of the county is a larger of pole) for three Acres. And if your furlong be longer. m may begin again, and add 9 pole 42 parts for four 5 Pole cres, &c. But when you come towards the end, and make of aid you have not enough to make out half an Acre, then ke the remaining length and call that the breadth, and toward the former will give you the true quantity defired in Columbia whole: This Table may be applied to plowing, and diversother things belonging to out h and Measure.

IF you would fet out a piece of Garden Ground of any number of Acres, and to be of any number of Perches broad: Or by having the breadth of any Furlong or Furlongs together in perches, you may readily by this Table find what quantity of Ground is contained in it or them together; And for the ready making use of this Table, it is required to have a rod or pole of fixteen foot and half in length, divided first into ten equal parts by Brass Nails struck into it, and again, let every one of these ten parts be also divided into ten smaller equal parts, by Notches or smaller Nails driven therein. And such a pole as this (or one of half the length may ferve) every Countrey Gentleman or Farmer, or any that I out Ground to Reap, Sow, Mow or Hedge, ought to have, for by it and this Table he may cast up his own Ground without trou bling a Surveyor. I shall shew the Use of the Table by Examples.

Example 1. If the side or end of a Field be 15 Pole of Perches broad, how many Pole of that breadth will make on Acre?

Perches.

Per. parts.

26. 66

Perches 17.77 In length will be Ground be 16 broad 16. 00 be a just Acre.

7. 62

Example 2. If the breadth of One, or several Furlongs ngether in Common Field, should contain in breadth at me end 12 Perches, and at the other end 22 Perches, how much in length will make an Acre throughout that Piece?

Because the breadth at both the ends are unequal, add them together: So 22 and 12 added together make 34. the half whereof is 17. which number you must use as if were the breadth throughout. Wherefore look in the fift Column of the Table for 17, and right against it you hall find 4 Rod 71 parts for half an Acre, in the next Column against 17 you shall find 9 Rod 42 parts for One kere; the next Column 18 pole 82 parts for 2 Acres. and in the last Column 27 pole 25 parts (or one quarter of pole) for three Acres. And if your furlong be longer. ou may begin again, and add 9 pole 42 parts for four keres, &c. But when you come towards the end, and ind you have not enough to make out half an Acre, then ake the remaining length and call that the breadth, and hen see what part of an Acre that will be, which added the former will give you the true quantity defired in he whole: This Table may be applyed to plowing,

leaping, Mowing, and divers other things belonging to

Now how many Gallons (either in Wine or Ale Measure) any Cask containeth by this Table, voit uft- (1.) Take the Diameter at the Head of the Veffel. dalfo the Diameter at the Bung in inches - (2.) Find the imber of inches at the Head of the Vessel in the first Comn of the Table, and the number which standeth against ose inches set down. -- (3.) Find the number of inches of e Veffels Bung, in the same first Column; and the numr that standeth against them, fet down under the former imber, twice. (4.) Add these three numbers together. (5.) Take the length of the Vessel in inches (in the inte) --- (6.) Multiply the fum of the three former numan added together, by the number of inches the Vessel long, and from the product of the Multiplication, cut f three figures, towards the right hand; fo shall the fime of figures toward the left hand be whole Gallons: d the three figures towards the right hand are thousand mof one Gallon. One Example will make all this plain.

In a Cask whose Diameter at the Head is 18 inches, at the Bung 32 inches, and in length 40 inches, how many Gallons is contained therein, both in Wine & Ale Measure?

The Diameter at the Head 18 inches — 0. 367 | 0. 301
The Diameter at the Bung 32 inches--1: 160 | 0. 951
The fame again — 1. 160 | 0. 951

the Veffel is {88 gallons and 1 pint {Ale } measur

1125 is a pint, 250 a quart, 375 is 3 pints, 500 is 2 ms, 625 is 5 pints, 750 is 3 quarts, and 875 is 7 pints.

the use of the Table, and thereby to find the hour of the day. Our Staff or other ftreight Ruler being divided, first I into 10 equal parts, and then each of those into other o equal parts, then will the Staff (or Ruler) be divided in-100 equal parts, which ought to be numbred at every oby 10, 20. 30, &c. to 100. Your Staff being thus prepared, when you would find the our of the day thereby, you must erect it perpendicular, or tit upright upon some plain level Ground or place, and ote the place where the end of the shadow of the Staff did by the staff did the shadow the ground; then with your Staff measure the mugth of the Shadow thereof in Staves lengths and hundred 7 1 arts of one length, according as 'tis numbered. This done,
7 8 xamp. 1. Suppose that upon the 6 day of May I erect my aff perpendicular, and measuring the length of the shadow ereof, I find the shadow to contain twice the length of my 107 138 aff, and 24 parts more. Wherefore I look in my Table for 196 e 6 day of May, which I find in the first Column towards
258 e lest hand, and casting my eye along that line towards eright hand, I find 2,24 to stand in the 7 Column, at the 3864 ad whereof is in figures 7. 5. which tells me that it is her 7 of the clock in the morning, or 5 in the afternoon. If this Observation had been made upon the 16 of July, dthe length of the shadow the same, the hour of the day ould have been the same also; for both those days are of ul length, and so is the 21 of February and the 1 of Ocm, - the 16 of April and the 6 of August, &c. Examp.2. Upon the 16 of April (or the 6 of Aug.) [ereck Staff, & find the length of the shadow tobe once the Staff's gth and 30 parts more; I look in the line against Aug. and April 16 for 1. 30 (the length of the shadow) and in 5 Column I find 1.33 (which is the nearest number to is the Table) over which there stands 9 & 3, which shews tit is almost 9 in the Morn. or a little after 3 in the Aft. lxamp. 3: Upon the 26 of May or the 26 of June, I find length of the shadow of the Staff to be once in length 120 parts more; if I feek for this length 1.20 against 126 and June 26, I can find no such number, but the rest is 1.1, over which stands 9.3, and the next number ater is 1.38, over which standeth 8.4, and so you may clude that the hour is between 8 and 9 in the Mornings

between 3 or 4 in the Afternoon.

AD WER-

ADVERTISEMENTS.

R. Robert Bateman's true Spirit of Scurvigrass, both Golden and Plain, so long famous for their Vertues, are truly prepared only by me Martha Smith, sole Executrix to the said Mr. Bateman, to whom only he communicated his Receipt for preparing the same, which are to be old at my House over against the Sun in Great Carter Lane near Doctors Commons, and at other places, as in my Printed Bills. Price each Bottle One Shilling.

And whereas one Stephen Terry, pretends to make the faid Mr. Bateman's Spirits, he is only an Upstart, and a Pretender, and his Spirits are Counterfeit: beware of

them.

The said Martha Smith sells also the Grand Bal. samick, or Health procuring Pills, approved by the most eminent Physicians of England, to be one of the most said pleasant Purgers in the World; their Virtues are set down in a printed Sheet given with them: Price One Shilling the Box.

THE Mirror of Martyrs, the First and Second Parts, lively expressing the Force of their Faith, the Fervency of their Love, the Wisdom of their Sayings, and the Patience of their Sufferings; with Letters to their Friends. 12ves.

Meses Reviv'd; a Treatise proving the unlawfulness

of earing Blood : By John Moor. 8vo.

Both Printed for Edward Brewster, at the Sign of the Crane in St. Paul's Church-Yard.
